

Body del Sol is proud to introduce CoolSculpting®

Freeze the Fat!

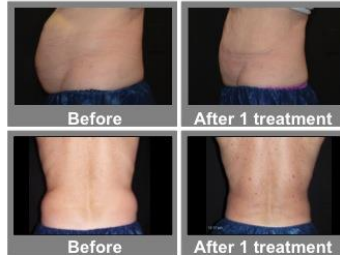

One treatment. One painless hour. 20-25% less fat.

We are excited to announce that we are now offering CoolSculpting®.

CoolSculpting is a breakthrough, non-invasive technology that uses precise cooling to eliminate stubborn fat. Developed at Harvard, CoolSculpting gently targets and cools unwanted fat cells in the selected area to induce a noticeable, natural-looking reduction in fat bulges.

You've probably heard some of the hype about this new technology that can "freeze" fat away. CoolSculpting has been featured on The Dr. Oz Show and Nightline and we were impressed with the consistent and predictable results
