

"Shine Bright like a Diamond with the New Diamond Youth Facial"

YOUR SKIN, OUR SCIENCE... *Pure Chemistry*[®]

Introducing our Exclusive

Diamond Youth Facial

In partnership with Innovative Skincare's results-driven iS CLINICAL line and Envy Medical's SilkPeel Dermalinfusion medical microdermabrasion machine. This 60-minute treatment (\$305) is designed to brighten complexions, leaving them luminous and nourished!

The new iS CLINICAL Youth Serum, Youth Eye Complex & Rejuvenating Masque from Innovative Skincare diminishes fine lines for an immediately firmed complexion. With continued use, the powerful formula encourages collagen synthesis to minimize the signs of ageing, including wrinkling, sagging and loss of resiliency, to maintain skin health throughout life. The paraben-free serum also contains safe growth factors that help shield skin and aid in preventing DNA damage.

The SilkPeel Dermalinfusion machine uses a patented diamond-tip vacuum technology designed to lift and exfoliate dry, dull outer layers of skin while simultaneously infusing a customized serum directly into the epidermis to plump fine lines, minimize dark spots and clarify pore congestion. The end result is luminous skin. Potent actives are combined with calming and nourishing botanicals developed for exclusive use with the SilkPeel Dermalinfusion system. This accelerated approach to brightening is effective without the risk of irritation.

"We are excited to partner with Innovative Skincare and Envy Medical on this exclusive new facial with such effective results,"
